Java Application System Developer Course Detail

Track 3

Java Application Software Developer: Phase1

Course Details	Hours of Study
<p>SQL Overview</p> <ul style="list-style-type: none">➤ Querying & Updating Data (Review) SELECT Statement: Common Elements SELECT Statements, Table Expressions and sub-queries SELECT Statement: The FROM Clause SELECT Statement: The WHERE Clause SELECT Statement: SELECT Clause & Aggregation Functions➤ Creating Database Objects Creating Tables, Specifying Integrity Constraints, Character Sets & Collating Sequences, Designing Tables, Views, Creating Databases, Users & Data Security➤ Introduction of ODBC Introduction, how does ODBC work, simple example of ODBC➤ Transaction and Multi user Usage (Overview)➤ Programming with SQL Introduction with embedded SQL Optimization of Statements➤ Procedural Database Objects Stored Procedures Stored Functions Triggers➤ OR Concepts User Defined data types, Inheritance, reference & Collections➤ DBA concepts	70

Java Application Software Developer: Phase 1

Course Details	Hours of Study
<p>Java Programming (Review)</p> <p>➤ Breaking the Surface The Way Java Works, Code Structure in Java, Anatomy of a Class, Writing a class with a Main, Look into the Main Method, Looping, Conditional branching, Exercises.</p> <p>➤ A Trip to Objectville Introduction, Making your first object, Movie Objects, Quick! Get out of Main Method, knowing Object better, Exercises</p> <p>➤ Know your variables What are variables, declaring a variable, ways of assigning values to variables, naming rules of class, method & variables, back away from that Keyword!, reserved Keywords, controlling your object, Object Reference, Java Exposed, Garbage Collection, Heap, Arrays, Exercises.</p> <p>➤ How Objects behave Who knows abt Objects?, Size Effects, Sending things to method, get back things from method, Java cares about Types, Cool things to do with parameters and return types, encapsulation, declaring and initializing instance variables, difference between instance and local variables, exercises.</p> <p>➤ Extra-Strength methods A Simple DOT COM game, Developing a Class, BRAIN POWER (know which class to develop first and which the next)</p> <p>➤ Using Java Library Java pre-built classes, Wake up & smell the library, things you can do with Array List, Java Exposed, comparing Array List to regular Array, Lets fix the Dotcom code, Lets build a REAL game, What needs to change, final version of Dotcom class, Boolean Expressions, Ready-Bake Code, the JAVA API, How to play with API, JAVA Cross Answers, Exercises.</p>	40

Java Application Software Developer: Phase 1

Course Details	Hours of Study
<p>Java Programming Contd.</p> <ul style="list-style-type: none"> ➤ Better living in Objectville Plan your JAVA Code with Future in mind, Serious Polymorphism, Life and Death of an Object ➤ Numbers Matter Global, Non-static, Static Methods, difference between non-static and static method, static methods, static variables, Initialing Static variables, Number formatting, Wrapping a primitive, Exercises. ➤ Risky Behavior Exceptions, Flow control try/catch block, Exceptions are Polymorphic, Java cross 7.0, Exercises. ➤ A Very Graphic Your first GUI, working with SWING, JFC/SWING, SWING Frameworks, Exercises. ➤ Working more with Objects saving objects, serialization, De-serialization, Exercises ➤ Making a Connection Connecting, sending & receiving, TCP port, read & write data to socket, Exercises ➤ Interacting with DB: JDBC Overview, JDBC drivers, step-by-step usage of JDBC API, seven basic steps in using JDBC, handling JDBC exceptions. ➤ Data Structure & Release Code Using Sort, Generic means for safety, Using Generic Classes, Using Generic Methods, Interfaces, extends & implements, using Polymorphic arguments and generics, deploying your solution, separate source code and class files, compiling and running packages, Steps for making and deploying a Java Web Start Aps. 	

Java Application Software Developer: Phase 1

Course Details	Hours of Study
Multi-threaded Programming with Java Technology <ul style="list-style-type: none">➤ Concepts➤ Foundations➤ Life Cycle—Thread Life Cycle➤ Scheduling➤ Synchronization➤ Complexities➤ Thread Specific Data (TSD)➤ Details➤ Libraries➤ RMI➤ Performance➤ SWING and Multi-threaded programming➤ Examples➤ Timings➤ API➤ Structuring Concurrent Applications, Thread Pools	40

Assessment of Phase 1: (a) Objective & Subjective Test (b) Interview (c) Grading & Evaluation. : 5 hrs

Java Application Software Developer: Phase 2

Course Details	Hours of Study
Web Component Development (Review) <ul style="list-style-type: none">➤ Developing a View Component➤ Developing a Controller Component➤ Developing Dynamic Forms➤ Sharing Application Resources Using the Servlet Context➤ Designing the Business tier➤ Developing Web Applications Using Session Management➤ Integrating Web Applications with Databases➤ Developing JSP Pages➤ Developing JSP pages Using Custom Tags➤ Developing Web Applications Using Struts Action Forms➤ Building Reusable Web Presentation Components	20
Web Component Model (Review) <ul style="list-style-type: none">➤ Developing Servlets➤ Developing with Java Server Pages Technology➤ Using Web-tier Design Patterns➤ Implementing a Transaction and Security Policy	25
MVC Architecture <ul style="list-style-type: none">➤ Introduction of MVC pattern➤ Evolution of Web Application design architecture<ul style="list-style-type: none">- Model 1- Model 2- Application frameworks	5

Java Application Software Developer: Phase 2

Course Details	Hours of Study
<p>Web Development---Servlets</p> <ul style="list-style-type: none"> ➤ Servlet in big picture of J2EE ➤ Servlet request & response model ➤ Servlet life cycle ➤ Servlet scope objects ➤ Servlet request ➤ Servlet response: Status, Header, Body ➤ Error Handling ➤ Deploying Application onto Tomcat Web Server 	50
<p>Web Development---Session Tracking (insight)</p> <ul style="list-style-type: none"> ➤ Underlying mechanisms ➤ Why do we need Session Tracking feature of Servlet ➤ Servlet Session Tracking Programming APIs ➤ Session timeout and invalidation 	10
<p>Web Development---STRUTS</p> <ul style="list-style-type: none"> ➤ Using JavaBeans Components in JSP Pages ➤ Overview of MVC Architecture--Revisit ➤ Simplifying Access to MVC Results: the JSP 2.0 Expression Language ➤ Overview and Motivation ➤ Setting up and Configuring Struts ➤ Processing requests with Action Objects ➤ Handling request params with Form Beans ➤ Prepopulating and redisplaying HTML forms ➤ Sample Application Development with STRUTS 	40

Java Application Software Developer: Phase 2

Course Details	Hours of Study
<p>Enterprise Java Security</p> <ul style="list-style-type: none"> ➤ Enterprise Security & Java ➤ Enterprise Network Security & Java Technology ➤ Web Security Overview ➤ Data Security with Public Key Technology ➤ Secured Socket Layer and openSSL ➤ Working with HTTPS ➤ Web Server Security ➤ Developing SSL Server Certificates 	30

Assessment of Phase 2: (a) Objective & Subjective Test (b) Interview (c) Grading & Evaluation: 5 hrs

Java Application Software Developer: Round-Up

Course Details	Hours of Study
<p>Application Development</p> <ul style="list-style-type: none"> ➤ Working with Tomcat Web Server ➤ Working with ANT Tool ➤ Working with JUnit ➤ Working with Eclipse 	50
Project Work & Work Shop	150
FINAL SKILL ASSESSMENT & TRAINING REPORT	20

Training Tack	Total Hours
Track 1: JASD	520 ~ 550
Doubt Clearing Session	50
Total Hours	~ 600

***** If time left then the student will uncover the world of EJB and JSF (to be decided based on the performance of the candidate)***
